

Save the Date: April 28th, 2018
Second Annual BioBlitz
at the Crooked Creek Environmental Learning Center

E-mail KGFV@iup.edu for details

A decorative border of green leaves and branches surrounds the text.

BioBlitz

What?

A BioBlitz is a comprehensive survey of living things, like birds and trees.

Why?

The purpose of a BioBlitz is to measure biodiversity, expose students to sampling techniques, and engage the community in citizen science

When?

April 28th, from 8am to 8pm. Events are staggered throughout the day, e-mail kgfv@iup.edu for the full schedule.

Where?

Crooked Creek Environmental Learning Center!

The address for the ELC is 142 Kerr Road, Ford City, PA, 16226. Keep an eye on the route, as there is another Kerr Road in the area. You will go down 422 to Kittanning, go left on Rte. 66, then left on Crooked Creek Dam Road, then left on Kerr Road. The ELC sits straight through the gates at the end of Kerr Road.

Who?

This is a free event sponsored by the ECO and SEEDS Club of Indiana University of Pennsylvania. There will be professionals leading the different groups that include professors, graduate students, and undergraduate students.

A decorative border of vibrant green leaves and branches frames the entire page, with the leaves appearing to grow from the top and bottom edges.

BioBlitz
